CBIQ

WHAT THE ROOM TOLD US

GME Leaders Exchange · Jersey City · September 17, 2026

Before you said a word, your registrations had already told the CBIQ benchmark where you stand. Your cohort of 18 leaders, measured against North America and the world.

Three columns throughout: the room / North America / the world. Every figure with its base stated.

cbiq.ai · globalmobilityexecutive.co

WHO WAS IN THE ROOM

The most North American cohort of 2026.

Eighteen Global Mobility leaders, 78% headquartered in the region.

78%

of organizations
headquartered in North
America

28%

Financial Services led
(Technology 22%,
Healthcare & Life
Sciences 17%)

1/3

each at 25,000+, 10,000–
25,000, and smaller: no
size band dominated

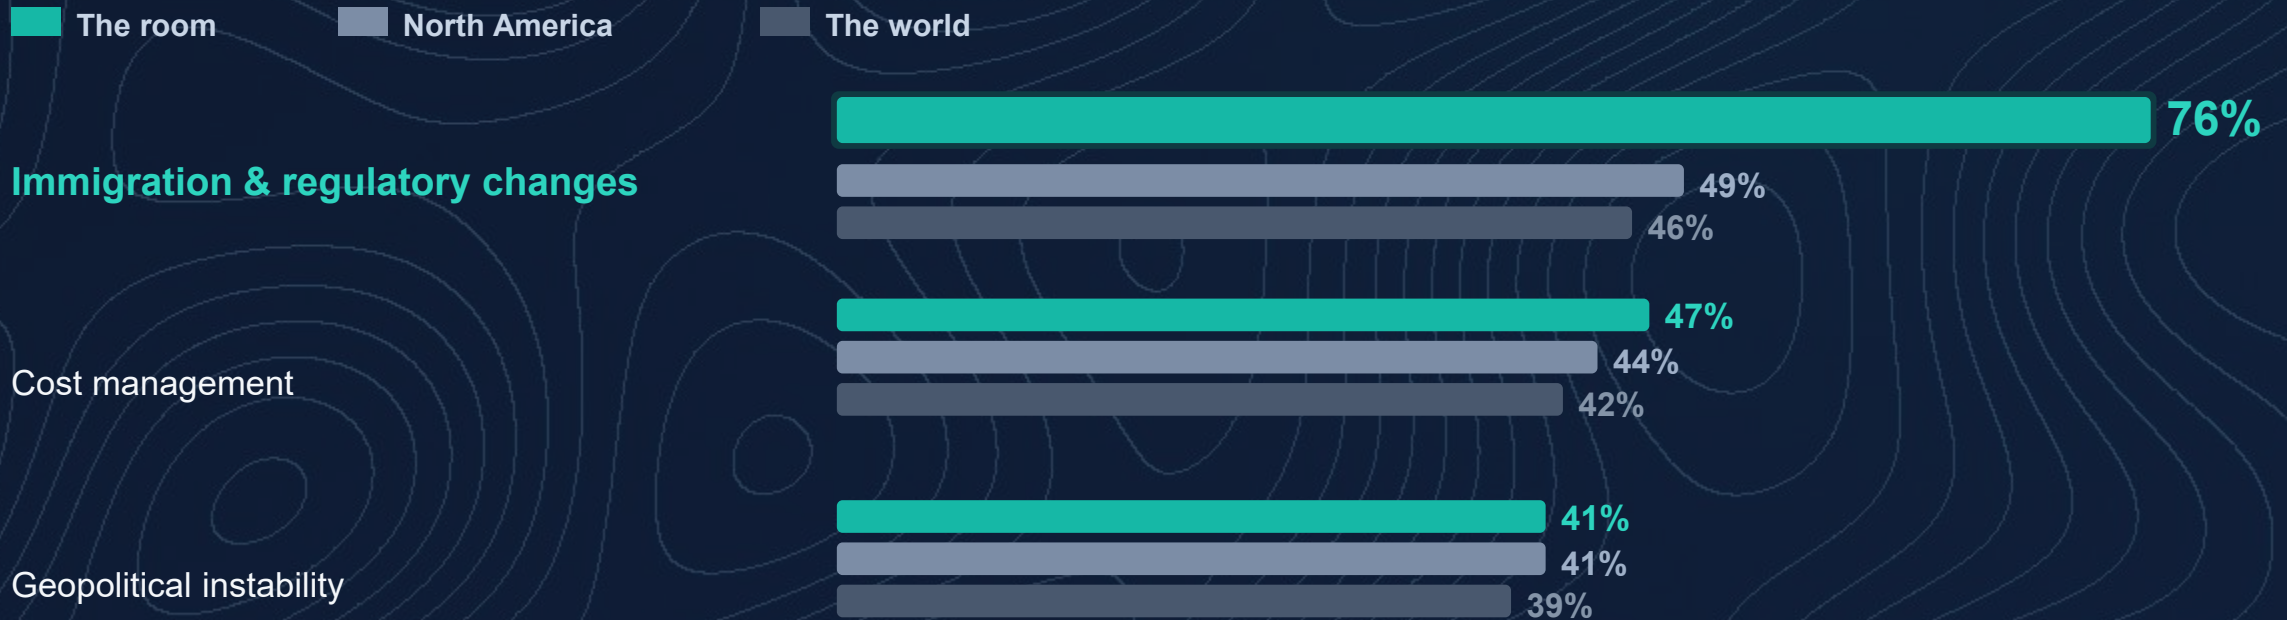

59%

run 100 or fewer long-term
assignments

Bases: 18 registrants (room). The room ran compact, diverse by sector, and overwhelmingly North American.

On cost and geopolitics, this room matched its region and the world.

The day closed on regulatory uncertainty. On cost, geopolitics and risk, the room answered within a few points of everyone else. On immigration, it stood alone.

Operational pressures (select up to 3). Bases: room 18 / North America ~380 / world ~800.

76% named immigration the top pressure. The widest room-to-market gap of 2026.

THE ROOM

76%

NORTH AMERICA

49%

THE WORLD

46%

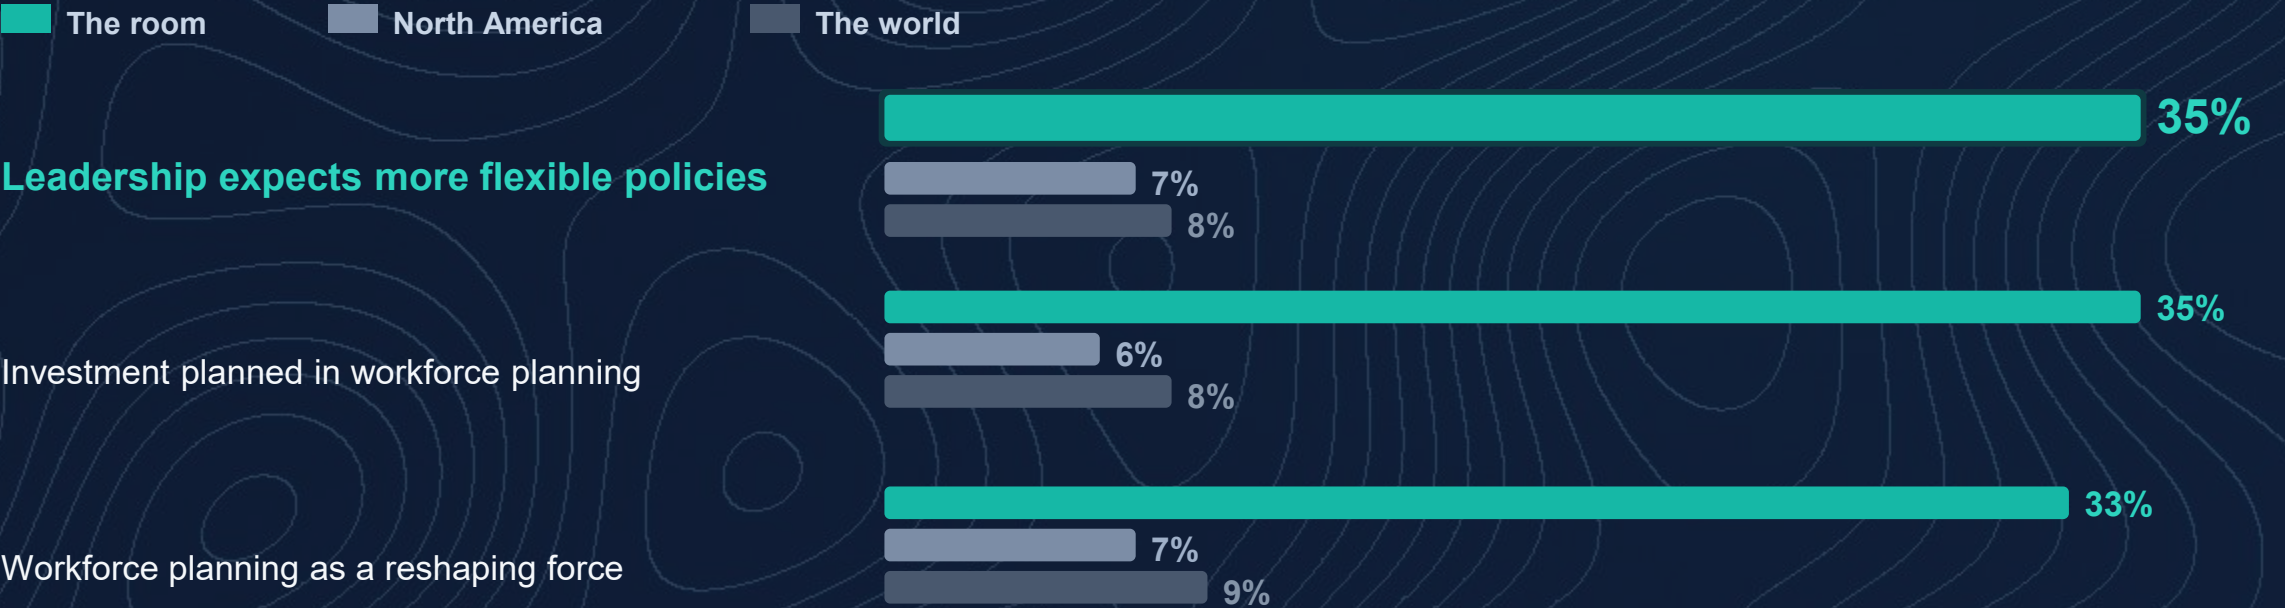

name immigration and regulatory change their top operational pressure.

North America runs immigration only three points hotter than the world. This room ran it 27 points hotter than its own region. That was not American weather. That was this room.

Operational pressures (select up to 3). Bases: room 18 / North America ~380 / world ~800.

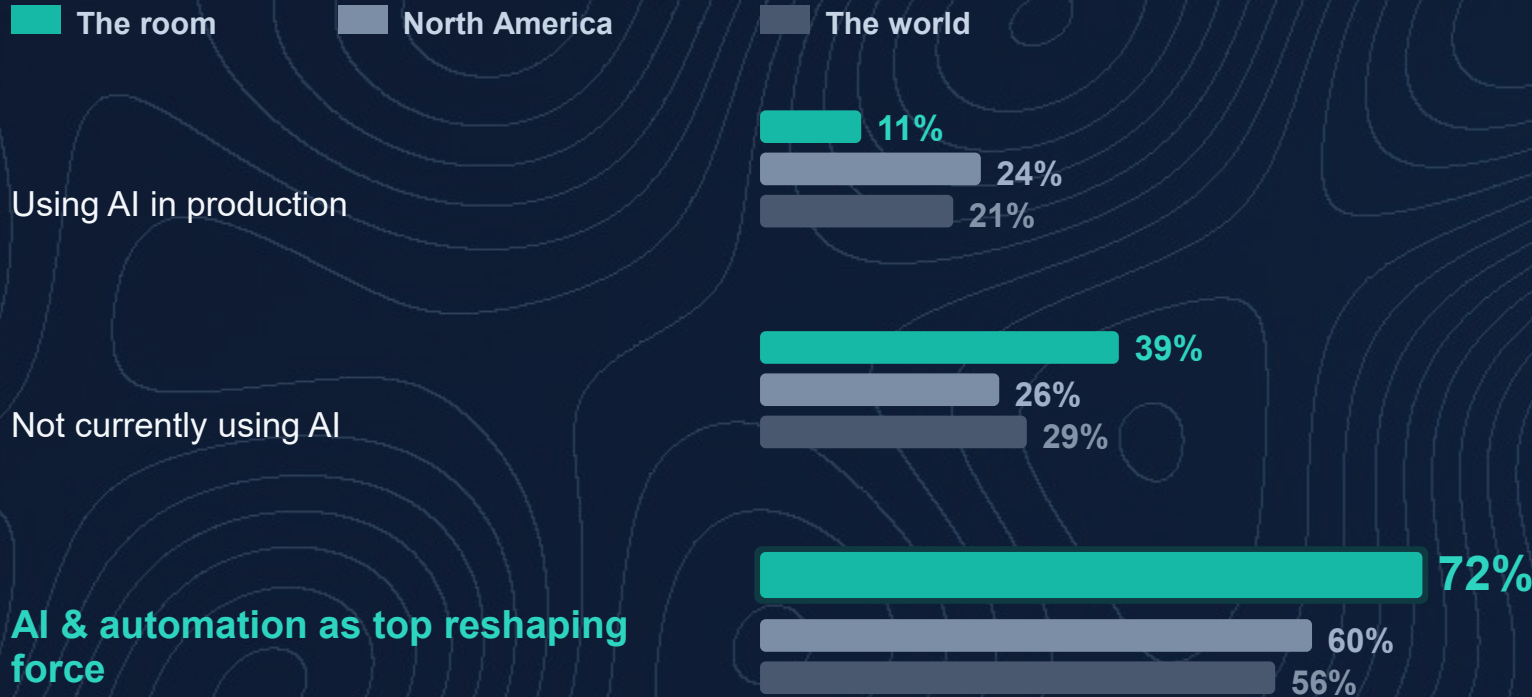

Redesigning around the constraint, not enduring it.

Where immigration constrains who can go where, this cohort plans further ahead and builds policies that flex. These answers barely register elsewhere: North America answers them exactly as the world does. This room broke out at four to five times both.

Bases: room 18 / North America ~380 / world ~800. The room broke out at four to five times its region and the world.

Belief highest, adoption lowest. The conversion gap, measured.

The paradox

North America leads the world in AI production. This room ran at less than half its own region's rate, and had the highest not-using share of the three views. Yet belief was intact: AI topped the room's reshaping forces.

AI adoption stage (single select) and reshaping forces (select up to 3). Bases: room 18 / North America ~380 / world ~800.

The demand for proof is arriving faster than the machinery to produce it.

LEADERSHIP EXPECTS COST CONTROL

71%

in the room, against 43% regionally and 42% globally.

The programs that build that machinery first keep their budgets.

51%

65%

have never proposed
technology funding

Room cost-control base 18. Wider-benchmark proof-gap items from the CBIQ contributor survey families, bases 47 to 61.

Choice, flexibility and clarity, loudest in this room.

Rising employee expectations (select up to 3). Bases: room 18 / North America ~380 / world ~800.

Both ends of the maturity curve, at the same table.

Technology

39% run a dedicated Global Mobility platform (world 30%), yet 39% still run on spreadsheets or manually (world ~29%).

The most outsourced cohort measured

100% of answering organizations outsource tax, 91% immigration (world 81% and 78%).

Confidence and churn, coexisting

28% call their model effective (world 21%), yet 11% expect significant operational change within 12 to 24 months (world 6%).

Business travel governance

Asked who is accountable if a compliance failure occurs, the most common answer is that nobody clearly is. Over a third do not track traveler days at all.

Room technology/outsourcing/model bases 18. Business travel governance from the wider CBIQ benchmark.

SEE WHERE YOU SIT

The room told us where it stands. The platform shows you where you do.

Every figure in this briefing comes from the live CBIQ benchmark, and your registration unlocked full Premium access to it. Sign in at cbiq.ai with your registration email and your access activates automatically.
